Having played and been involved in rugby for over a decade now, I have seen, not only here, but worldwide, the positive impact that rugby has on people. I see the positive impact on youth and sculpting young men. I see the vigor in keeps in old men. One cannot help but see the structure and respect it instills in people of all ages. I wish to help spread these positive virtues in a country that it can so expeditiously grow. There is an amazing amount of room and opportunity here in the U.S. to grow and I want to be a part of it. Not only do I have the passion and desire, I have the skill set, understanding and experience to help rugby succeed at an even faster rate than it has been. My current profession requires being available via phone and emailing almost 24 hours a day. I believe this accessibility is necessary to the position that I am nominating myself for. If voted in, I am ready and willing to do what it takes to represent our region. It is time for U.S. rugby to vault itself to an even higher level on the national stage and I believe that starts at the local and regional level!
