

## **Jason Pollack**

I have been involved in rugby since I showed up to my first practice during my freshman year of College in 2000. I have been an administrator since becoming Match Secretary of my College Club (John Brown University) beginning in 2002. I have been an officer with Little Rock Rugby since 2011 including 2 years as President (when I led our transition into the TRU from the South) and the last 2 years as an Assistant Coach and representative to the TRU and RRRC from my club.

My interactions with the RRRC Competitions Committee over the last 4 years have inspired me to get involved with helping to lead our sport in a way that impacts more than just my local club. I admire the dedicated volunteers who make so much of rugby in this country possible, and would be honored to work alongside them. I hope to be able to bring fresh ideas and strong organizational and communication skills to help the committee guide the RRRC through the changing landscape that is American club rugby.

In my club, I have used my organizational ability, my desire to listen and empathize, and my verbal and written communication skills to lead our team during an unprecedented run of success, both on the field and organizationally. I would leap at the opportunity to use those skills to contribute more broadly to rugby in our community.
