Player

Kingston High School Rugby (2004-2005)

Player

With over 20 years of experience in the rugby community across multiple geographical unions, I'm confident in my experience to assist others in evolving the game of rugby. My background in software project management and running large scale esport competitions & events will be a valuable asset on the competition committee; where I like to take applications that have worked elsewhere and see how to custom tailor it to the rugby world.

Currently I have an active hand in helping San Antonio Rugby's leadership, helping them grow into a multi-sided club and a regular participant in playoffs and nationals. I value relationship building with other clubs so that we can focus on bettering ourselves and pushing the envelope competitively.
